RE: New VRE media

DATE: September 22, 2015

Effective Monday September 28, 2015, the microbiology lab will be using a new medium for VRE testing. The new formulation will result in an increased sensitivity and an improved turnaround time that will align with the 20 hour MRSA testing protocol.

If you have any questions or require any other information please do not hesitate to contact me.

Thank You.

Mark Gaskin
